DETAILS

[Glossary](#)

A CARFAX Vehicle History Report is based only on information supplied to CARFAX. CARFAX checked over 5 billion vehicle history events and found **12 record(s)** for this 2001 MERCURY SABLE LS (1MEFM53U61A620565).

OWNER 1	Date:	Mileage:	Source:	Comments:
Purchased: 2000 Type: Rental Where: New York Est. miles/year: --- Est. length owned: 12/20/00 - 11/15/01 (10 months)	12/19/2000		NICB	Vehicle manufactured and shipped to original dealer
	12/20/2000		New York Motor Vehicle Dept. Buffalo, NY	First owner reported Registered as rental vehicle (major car rental company)
	11/15/2001	21,403	Auto Auction	Sold at auction

in Central Region
Listed as
a manufacturer vehicle

Dealers routinely buy and sell millions of used vehicles at auction each year.

OWNER 2

Purchased: 2001
Where: Missouri
Est. miles/year: 10,585/yr
Est. length owned: 11/29/01 - present
(6 yrs. 8 mo.)

Low mileage! This owner drove an estimated 10,585 miles per year, lower than the industry average of 15,000 miles. These vehicles can be a better value.

Date:	Mileage:	Source:	Comments:
11/29/2001		Missouri Motor Vehicle Dept. Saint Louis, MO Title #QG016434	Title issued or updated New owner reported

GLOSSARY

[View Full Glossary](#)

- First Owner**
 When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

- **New Owner Reported**

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

- **Ownership History**

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1994 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

- **Rental**

Vehicle was registered by a rental agency.

- **Title Issued**

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

- Good
- Acceptable
- Marginal
- Poor
- Very Poor

The National Highway Traffic Safety Administration (NHTSA) provides 3 different ratings - [full-width frontal crash test](#) , [side impact crash test](#) , and [rollover resistance](#) . The frontal crash test indicates how well the safety features and restraints will protect an occupant in a head-on collision. The side-impact test conveys the chance of a severe chest injury, while the rollover resistance rating estimates the risk of rolling over in a single vehicle crash. Go to [NHTSA](#) to learn more about these results.

Not tested by IIHS

Insurance Institute for Highway Safety (IIHS) conducts four 5 mph crash tests to assess bumper performance. These results convey how well this 2001 MERCURY SABLE LS bumpers will protect the car body from damage in low-speed collisions. Low-speed damage repair costs are obtained from the Insurance Institute for Highway Safety, Highway Loss Data Institute.

[Back to top](#)

Injury, Collision, & Theft Indicators

Index:	Score:	Rating:
Injury Index	78	Better than average
Collision Index	76	Better than average
Theft Index	53	Better than average

These scores are stated in relative terms, with 100 being the average for all cars in each category. Scores greater than 100 represent higher risk in each category. For example, an injury indicator score of 122 means that a passenger in this model is 22% more likely to be injured in an accident. The injury, collision, and theft indicators for this 2001 MERCURY SABLE LS are provided by the Insurance Institute for Highway Safety, Highway Loss Data Institute. [Learn more](#) about these results.

Safety Recalls

NHTSA Safety Recalls:

Important: The following recalls were issued for the 2001 MERCURY SABLE LS by the National Highway Traffic and Safety Administration (NHTSA). To find out if a specific 2001 MERCURY SABLE LS still has open recalls that require repair, CARFAX recommends contacting an [authorized dealership](#) for more information.

Recall date: Not reported
 Units potentially affected: 5,961
 NHTSA campaign number: 00V240000
 Defective part or component: INTERIOR SYSTEMS:RESTRAINT:BELT ANCHOR AND ATTACHMENT
 Description: Vehicle Description: Passenger vehicles. The Child Safety Seat Anchor Latch (ISO-fix anchor) fasteners do not have adequate residual torque. The anchors are secured to the floor pan with a reinforcement plate that has two studs that extend upward through the floor pan and the ISO-fix anchor. The sealer on the floor pan could cause a soft joint and, even if the nuts are properly torqued, road vibrations could cause the nut to work its way completely off the stud. The anchor may not hold the child safety seat in position during an accident, increasing the risk of injury to the occupant of the child safety seat. Dealers will remove and re-install the bracket nut using a torque retention material (red loctite). Owner notification began September 11, 2000. Owners who take their vehicles to an authorized dealer on an agreed upon service date and do not receive the free remedy within a reasonable time should contact Ford at 1-800-392-3673.

Recall date: 03-06-2001
 Units potentially affected: 495,000
 NHTSA campaign number: 00V396000
 Defective part or component: EQUIPMENT:CHILD SEAT
 Description: Certain sport utility vehicles, pickup trucks, and passenger vehicles fail to comply with the requirements of Federal Motor Vehicle Safety Standard 225, "child restraint anchorage systems." The affected Expedition/Navigator owner guides do not identify the locations of seating positions equipped with tether anchorages, and do not provide instructions for securing child seats to these tether anchorages. The F150 SC owner guides do not provide the procedure for securing child seats to the tether anchorages. The Taurus/Sable owner guides do not identify the center rear seating position as having latch compatible lower anchorages. In the event of a crash, the child seat may not be properly attached increasing the risk of injury to the child. Owners will be provided with owner guide inserts revised to provide the required information, and instructions for affixing these inserts to their owner guides. Customers will also be advised that if they prefer, their dealer will affix the inserts to their owner guides.

Recall date: 03-07-2001
 Units potentially affected: 157,000
 NHTSA campaign number: 01V078000
 Defective part or component: LIGHTING:SWITCH:BUTTON:RING:TAIL LIGHTS
 Description: Vehicle Description: Passenger vehicles equipped with adjustable pedals. If the grease from the adjustable pedal assembly enters the stop lamp switch, it can contaminate the contacts leading to carbon build up, and potentially, a short circuit. A short circuit could lead to either the brake lamps staying on, or to a loss of brake lamp function, increasing the risk of a crash. Dealers will replace the brake lamp switch and wipe down the adjustable pedal assembly to remove excess grease. Owner notification began March 22, 2001. Owners who take their vehicles to an authorized dealer on an agreed upon service date and do not receive the free remedy within a reasonable time should contact Ford at 1-800-392-3673.

Recall date: 04-27-2001
 Units potentially affected: 4,567
 NHTSA campaign number: 01V144000
 Defective part or component: INTERIOR SYSTEMS:ACTIVE RESTRAINTS:BELT BUCKLES
 Description: Vehicle Description: Passenger cars. The seat belt buckle tongue may not fully eject from the buckle assembly when the release button is pushed slowly. This condition could also result in a partial latch of the tongue in the buckle. In the event of a vehicle crash, the vehicle occupant may not be properly restrained, possibly resulting in personal injury or death. Dealers will replace the driver and right front passenger seat belt buckles. Owner notification began May 4, 2001. Owners who take their vehicles to an authorized dealer on an agreed upon service date and do not receive the free remedy within a reasonable time should contact Ford at 1-800-392-3673.

Recall date: 08-08-2001
 Units potentially affected: 1,083,000
 NHTSA campaign number: 01V258000
 Defective part or component: VISUAL SYSTEMS:WINDSHIELD WIPER:MOTOR

Description: Vehicle Description: Passenger cars, sport utility vehicles, and light and medium duty pickup trucks. A switch located in the plastic cover of the wiper motor gear case could malfunction and overheat, potentially resulting in loss of intermittent wiper function, loss of wiper park function, complete loss of wiper function, or ignition of the plastic cover material. Switch malfunction is most likely to occur when the intermittent setting of the wipers is being used, or when snow or ice obstructs the blades from returning to the "parked" position at the bottom of the windshield. These vehicles were built at the following assembly plants:

Recall date: 10-22-2002

Units potentially affected: 369,614

NHTSA campaign number: 02V266000

Defective part or component: BRAKES:HYDRAULIC:PEDAL

Description: Certain passenger vehicles equipped with adjustable pedals are being recalled in order to adjust the brake and accelerator pedals to a minimum of 50 mm of lateral separation. Simultaneous application of both the brake and accelerator pedals could result in an increase in engine RPM. This could result in a customer experiencing an "unintended vehicle speed increase" or a perceived "unable to stop" condition. Owners will be instructed as to the proper way to set the position of the pedals and to take their vehicles to a dealer to have the spacing between the brake and accelerator pedals measured. If the spacing is found to be less than 50 mm, the dealer will adjust the pedals to increase the distance between them to greater than 50 mm. Owner notification began October 28, 2002. Owners who do not receive the free remedy within a reasonable time should contact Ford at 1-866-436-7332.

Recall date: 04-05-2004

Units potentially affected: 938,789

NHTSA campaign number: 04V106000

Defective part or component: SERVICE BRAKES, HYDRAULIC:PEDALS AND LINKAGES

Description: Certain passenger vehicles are being recalled to correct a problem with a malfunctioning stop lamp switch and/or associated wiring. This malfunctioning could render the stop lamps inoperable or cause them to stay on all the time. If the switch and/or associated wiring fail in the open position, the brake lights will not actuate and the driver will not be able to shift the vehicle out of "park". If they fail in the closed position, the brake lights will remain on, which will not allow the speed control to be activated. This could also cause the battery to discharge. Dealers will remove the stop lamp switch and associated wiring assembly and install a newly designed stop lamp switch and wire assembly. Owner notification is expected to begin on April 5, 2004. Owners should contact Ford at 1-800-392-3673.

Recall date: Not reported

Units potentially affected: 899,060

NHTSA campaign number: 04V332000

Defective part or component: SUSPENSION:FRONT:SPRINGS:COIL SPRINGS

Description: On certain passenger vehicles currently registered in the states of Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, West Virginia, Wisconsin, and the District of Columbia, the front coil springs could potentially fracture when operated in high corrosion areas (where salt is used on the roadways for winter). A fractured spring could move past the spring seat and contact a front tire. If a spring should fracture and come into contact with a tire, the tire may rupture resulting in a rapid air loss, which could result in a crash. Dealers will install protective spring shields. Owner notification is expected to begin during August 2004. Owners should contact Ford at 1-800-392-3673. In addition, Ford is extending the coverage of the front coil springs, for fracture only, up to 10 years of service or 150,000 miles from the warranty start date of the vehicle, whichever occurs first. If the vehicle has already accumulated more than 150,000 miles, this coverage will last until July 31, 2005. If either front coil spring fractures, dealers will replace both front springs at no charge to the owner under the terms of this extended coverage.

This 2001 MERCURY SABLE LS safety recall information was provided by the Insurance Institute for Highway Safety, Highway Data Loss Institute and is derived from the [National Highway Traffic and Safety Administration](#) list of safety recalls. Please call the National Highway Traffic and Safety Administration Auto Safety Hotline at 1-888-DASH-2-DOT (1-888-327-4236) to report safety defects or to obtain information on cars, trucks, child seats, and highway or traffic safety. New Car Test Drive Review

NewCarTestDrive.com

Category:

Summary:

Review:

Safe, solid, practical, and with passion for driving.

By Ted West, NewCarTestDrive.com

The Mercury Sable is a happy blend of family-car safety and mid-market value. When equipped with the optional Duratec V6, it is blessed with the kind of performance and agility expected in expensive sports sedans. The Sable combines the virtues of high quality, five-star crash protection and comfortable accommodations, plus a healthy helping of driving fun. That's a combination that should see Mercury's star player selling large numbers well into the millennium.

Overview:

This bread-and-butter sedan has one big trick up its sleeve: It's a hot drive for even the most dedicated enthusiast. And it surrenders nothing, nothing, in safety, comfort or practicality.

Mercury Sable resides at the large end of the current mid-size scale. Its interior is spacious and pleasing, and by and large, its controls and instrumentation are contemporary, straightforward and easy to use. Its list of safety features is comprehensive, its five-star front impact rating from the federal government is unbeatable. Its trunk is capacious.

Sable even offers a real station-wagon variant, an increasingly rare choice in a

market dominated by SUVs and minivans. But unlike those taller vehicles, the Sable wagon is every bit as fun to drive as the sedan, while still adding kid and cargo-hauling capacity.

In short, Mercury's Sable is a winner, with no reservations.
